Weekly Report 16

1/7 - 1/13

This past week, my work has consisted mainly of research and translation for my original work. My original work is something that encompasses all of the new information and insight I have gained from ISM so far to this date.

My original work consists of a Traditional business plan created for a finance and strategy consulting firm. A Traditional business plan is made up of important topics and key details necessary in order to ensure that my LLC is successful and can deal with issues which are inevitable in this career field. It contains an Executive Summary, Company Description, the company's Services, Market, Financial Business Model and Risk Management, which are the main aspects of a company that must be researched thoroughly prior to starting the company to ensure that there are few issues to deal with as possible in the company's future.

Another focus of this last week was my continuous goal of attempting to find a mentor. Fortunately, I contacted two professionals that seemed as the best option to mentor me and although one of them was unable to make the time commitment, the other professional agreed to assisting me with my future ISM projects., therefore agreeing to be my mentor for the remainder of the ISM year.
